

GuardianOne Safety Infrastructure for care-at-home programs

Always-on visibility for falls, SOS, location and inactivity between readings and care-manager touchpoints.

What GuardianOne delivers

Combines the GuardianOne wearable and EzyHealth cloud to add the missing safety and activity visibility around home-based monitoring workflows.

Providers: safety events beyond vitals and earlier outreach context

Patients: fall, SOS, GPS and QR medical identity on wrist

Channel: program-ready pricing, dashboard value and renewals

Funding and reimbursement pathways

Medicare-aligned RPM

Adds safety visibility between physiologic readings.

CMS covers RPM when provider, patient, device and medical-necessity criteria are met.

CCM program fit

Daily activity context beyond periodic care-manager calls.

CMS pays CCM under the PFS for eligible patients with multiple chronic conditions.

HSA / FSA funding

GuardianOne is listed by Ezybandz as HSA/FSA eligible in the U.S.

Use an HSA/FSA card at checkout or submit for reimbursement; plan rules vary.

U.S. care program pricing

Initial program - hardware + service		
SKU	TERM	LIST
GO-US-INIT-03M	3 Mo	\$247
GO-US-INIT-06M	6 Mo	\$394
GO-US-INIT-12M	12 Mo	\$588
Renewal - post-term service		
SKU	TERM	LIST
GO-US-REN-03M	3 Mo	\$72
GO-US-REN-06M	6 Mo	\$144
GO-US-REN-12M	12 Mo	\$288

If service continues after an initial 3-month or 6-month term, billing continues at \$49/month until 12 months total is reached; renewal pricing applies thereafter. Pricing shown from ezybandz.com. Medicare reimbursement and HSA/FSA use depend on provider workflows, plan rules and eligibility.
